Utilizing law enforcement experts, you’ll find this video is one that is not only long overdue but also one you’ll be using for a long time to come.

This is another roll call video we’ve been asked to produce by many law enforcement agencies. It offers some very basic yet often overlooked or, perhaps, underutilized tactics to increase officer safety. This roll call video features experts with the St. Louis Metropolitan Police Department training academy and Jim Crotty of ‘Strategies for Officer Survival.’

**RCR21 Rape Victims’ Do’s and Don’ts**

The proliferation of violent gangs in the United States has taxed law enforcement agencies at every level. And, in many instances, gangs have spread from major metropolitan areas to suburban, even rural settings. This roll call program features some of the nation’s leading police experts on gangs providing specific insight for street cops who may come face to face with a violent gang member. Highly recommended for all law enforcement video libraries.
RCR23 Foot Pursuits
Featuring Jim Crotty of 'Strategies for Officer Survival,' this roll call video is absolutely vital for street cops who may need a refresher in the basics of safe foot pursuits. It’s also a tremendous video presentation for recruits and young officers fresh from academy training. Each year officers are murdered because they get complacent during foot pursuits or simply neglect some of the basics. After watching this video, they will definitely be on their toes again!

RCR24 Body Language
This is a crucial addition to your video library. We feel confident it can help save officers from serious injury and even death. Subjects who are potentially violent almost invariably display various physical “signs” that they are volatile. However, many cops simply have never been taught or shown these simple physical displays of anxiety or anger. In this fast-paced roll call video, officers will go away with a powerful awareness that subjects’ body language is something all cops must carefully observe.

RCR25 Felony Vehicle Stops
An absolutely vital roll call training program which features Jim Crotty of 'Strategies for Officer Survival' outlining the most critical elements of proper felony vehicle stops. The program visually guides officers through each important safety step that is vital when stopping a subject in a motor vehicle suspected of a possible felony. Its fast-paced presentation may mean you'll need to stop tape at intervals for interactive analysis / discussion and reaffirmation of strategic points.

RCR26 Response to Felonies in Progress
This is another program that police departments have requested we produce, and we listened! Often, officers become complacent or lackadaisical responding to alarms. Even when an alarm may be a good one, complacent cops can go barreling into a potentially explosive scene. This 8 minute presentation will hit home for all street officers by powerfully showing the right way to respond to felonies in progress and just how dangerous it can be when you respond using poor tactics.

RCR27 Stopping Vehicles with Tinted Windows
Technical expert Jim Crotty of 'Strategies for Officer Survival' is featured along with officers from the Orange County (FL) Sheriff's Department. You'll see excellent demonstrations of the safest approaches for officers who have stopped vehicles with heavily-tinted windows. Officers will learn the very best tactics for keeping subjects off-balance and uncertain about officers' presence and positioning. Also, they'll learn exactly where to position themselves most strategically for the safest possible interaction with subjects in tinted windows. An invaluable addition to an agency's video library.

RCR28 Pursuit Intervention Techniques (P.I.T)
If your department is considering development of the Pursuit Intervention Technique (P.I.T.) as part of your pursuit policy, you'll want this program! It features driving experts from two of the nation's finest E.V.O.C. schools, San Bernardino( CA) Sheriff's and Fairfax County (VA).
RCR29 Proper Handcuffing Technique
As any peace officer knows, improper and unsafe handcuffing of subjects can fatal. In recent years, subjects have wiggled free of handcuffs, have accessed handcuff keys, etc. to ultimately end up fatally shooting law enforcement officers. This roll call video, we believe, will be an indispensable addition to any agency’s video library. It features police experts taking you step-by-step on the right way to cuff subjects. You'll want to use this program time and again not only for green recruits but also veteran street cops who may occasionally get lax and complacent.

RCR30 The Standing Modified Search
Police expert Tony Kirkbright of the Antioch, California Police Department, is featured in this roll call video walking you through a perfectly executed ‘standing modified search.’ This is another critical element for officers to learn and, in many cases, re-learn. Not only will Tony show officers the most tactically safe approach to searching of subjects but also the best, most thorough means an officer can pat down a subject. Add this to your shopping list of videos from IN THE LINE OF DUTY. It'll be a tremendous video resource for many years to come.

RCR31 How Bad Guys Get Over on Cops - Parts 1 & 2
Defensive Tactics Expert Sgt. Mike Muxo of the St. Louis Metropolitan PD explains and shows several of the tactics bad guys utilize to "get over on the cops" in this two-part roll call special. It'll amaze even veteran street officers the lengths to which the bad guys will go to try to scam or "blindside" the police. Each one of the tips in these two roll call videos could someday be a lifesaver for officers. We strongly recommend you add this to your IN THE LINE OF DUTY video checklist.

RCR32 Protective Vests
This is more than a practical demonstration on purchasing the very best, most comfortable and safest protective body armor. It's an absolutely vital practical demonstration! Of all an officer's or a department's choices, there isn't much that is more crucial for officer safety than the selection of the right protective body armor; the armor that gives the street cop the best chance of surviving gunfire. Tony Kirkbright of the Antioch (CA) Police Department demonstrates just how vital an officer's body armor selection is. You'll want each officer in your department to view this roll call video more than once.

RCR33 What You Need to Know Before Buying Holsters
In one of the most graphic demonstrations ever made, the St. Louis Police Department literally rips apart holsters before your very eyes! It's their way of determining which holsters last the longest under the most extreme conditions. If you or one of your officers is attacked, which holster do YOU believe would stand up to an assailant's effort to wrest free a gun? See what St. Louis determined after putting these holsters from every major manufacturer through their very grueling paces.

Mind Games and Powers of Observation  Programs not available individually

This is a series of short roll call training programs titled “Did you See That?” and “Eye Spy”. In each the viewer has a limited amount of time to view and assimilate details from either old crime scene photographs or wanted posters. It’s important for the trainer or instructor to impress upon the viewers/students that they, indeed, do have only several seconds to study, review and remember what they’ve seen. The programs are geared towards officers’ and students’ ability to recollect and recall facts and information which may prove invaluable later. They also provide officers/students with opportunities to hone their visual skills which will, in all likelihood, be crucial in their careers.

Did You See That?

DYST1 Weejee on the Spot
In the 1930s and 1940s, no crime scene photographer was more famous than Arthur Felig, nicknamed Weejee after the Ouija board because he had an amazing ability to get to crime scenes even before police. Weejee used to say, “In my particular case I didn’t wait until somebody gave me a job, I went and created one for myself—freelance photographer—and naturally I picked the story that meant something.”

DYST2 Seeking Butch Cassidy
Probably one of the most famous infamous outlaws, Robert Leroy Parker who with his partner Harry Longabaugh performed a number of criminal exploits with their ‘Hole in the Wall’ gang of the 1890s. Their misdeeds were to gain them international attention and many years later they were memorialized in the film Butch Cassidy and the Sundance Kid.

DYST3 Finding an Assassin
You are part of a national manhunt for the assassinator of a revered American Leader. What is the information you’ll want to put away in a safe place in your mind that you can then withdraw and use at a moment’s notice? What are you going to be looking for in crowds of people if you were only able to get a glance at an individual who may fit that description.

DYST4 Street Killing
For cops there be may be only one opportunity, perhaps only lasting a few seconds, for you to see the obvious. Weejee, the famous freelance photographer of the 1930s and 1940s, took all kinds of amazing shots at crime scenes, often using his sixth sense to get to the action before even the police did. This program includes a prime example of Weejee’s sixth sense. Remember little things can mean a lot.

DYST5 Seen a Mobster Lately?
You have a number of suspects wanted by the law and unexpectedly you see a number of them—but only for a precious few seconds. What are you going to zero in on first? Hair color, eyes, weight, or as one veteran cop said long ago, the ears, which he claimed were as different as fingerprints on people.
DYST6 Search for a Serial Killer
He was one of America’s most wanted monsters and it took law enforcement a long time to nab him but not until after he had murdered at least 30 young women across multiple states. Arresting Ted Bundy was among police officers’ top tasks in the mid-1970s until he was finally arrested in Florida 1978 after trying to strangle a co-ed. He called himself the most coldhearted son of a bitch who ever lived. If you’d been a cop seeking Ted Bundy back then and thought you had a sighting, everyone would be asking “Did You See That?”

DYST7 Lips That Lie
How many times have you seen an argument on the baseball field and wondered what was being said? If you could only 'read lips', it'd make for some very salty and entertaining viewing, wouldn't it? Even in daily encounters, knowing even a little bit of lip reading could be beneficial. So, here goes in Did You See That? / Number #7, you get your chance to try to 'read' what the lips are saying.

DYST8 The Lineup of Stars
For many years, lineups have been used to try to determine the guilty subjects in crimes and give witnesses a chance to 'eyeball' them for positive identification. You’re about to get a sample of what witnesses go through in Did You See That/#8, which we call the Lineup of Stars.

DYST9 Can You Walk and Chew Gum?
This is a visual and aural challenge! You'll need to call on your multi-tasking skills to hit a home run here, because we ask you to watch an old TV news clip and listen to police audio dispatch - at the same time.

DYST10 The Nose Knows
It's a police lineup, and you have very limited information as a witness. In fact, you’ve only been able to get a good look at a suspect’s nose. Take a look at this nosy lineup, and then, we ask, “Do you have a bloodhound’s nose, or just a nosebleed?”

DYST11 This is Earie
Many years ago, a great veteran detective claimed you could readily identify a subject by his or her ears. What do you think? Well, ear and now, let’s put that to the test.

DYST12 The Eyes Have
If you were a cop, what’s one the first things you’d notice about a subject? Probably the eyes, but do you really see them? Here’s a little test of your Eye-Q, that we’ve thrown in a ringer or two, so I assure you, you won’t be stumped. You’ll have to eyeball these quickly now, so try not to blink. Here we go!
DYST13 Lip Service
Lip readers know of things the rest of us don't because they know how to read lips, and with that skill comes the ability to hear by seeing a lot of what you and I may miss. Maybe just a little lip reading would be a good thing for police officers, especially when it comes to these words: gun, knife, kill, shoot, drugs, dope, attack, run, hit, pig, and doughnut. We're going to give you three sets of lips, all uttering the same word. Give it your best shot, and we'll red pencil you at the end.

DYST14 Bogie and Bacall
Humphrey Bogart and Lauren Bacall were, perhaps the coolest couple on the silver screen back in the day. Let's see how well you know their mannerisms, patter, and props in this short scene before we come back and ask, "Did you see that?"

Eye Spy

EyeSpy1
Did you ever look at an old photo of yourself and wonder, "Now why did I have that mysterious little smile?" or "Why did I look so mad?" or "What the what' was that all about?" Here are some photos that have historical significance. Let's see if you can figure out what was going on at the moment the snap was shot.

EyeSpy2
It's been said a picture is worth a thousand words, but if the words aren't accurate, then what's the picture word, hmm? Take a look at these historical photos and see if you can photo shop for the correct answer.

EyeSpy3
What does your gut tell you when you see something you've never seen before? Do you think A, B, C? What if it's D, E, F, or even G? Here's your challenge.

EyeSpy4
How good are you at finding a piece of the puzzle and then being able to put all the pieces together? We're about to find out.
